

Building a Future-Ready Workforce for Viksit Bharat @2047

“The future we imagine depends on the youth we prepare today”

Employment Snapshot

- India produces ~1.4–1.5 crore graduates annually
(Source: AISHE – All India Survey on Higher Education, Ministry of Education, Govt. of India)
- Only ~45–50% of graduates are considered job-ready
(Source: India Skills Report 2024–25 — Wheebox, CII, AICTE, AIU)
- Less than 25% of rural youth access future-skill pathways
(Source: NSO surveys & Skill India ecosystem assessments — rural digital and skilling access)
- Employers report major gaps in practical and applied skills
(Source: World Economic Forum — Future of Jobs Report 2025)

Workforce Gap in Emerging Sectors (India)

Sector	Required by 2030	Current Workforce
EV & Battery Tech	20–25 lakh	< 1 lakh
Semiconductor Manufacturing	3–4 lakh	< 50,000
Drone Operations	8–10 lakh	< 50,000
Cybersecurity Roles	7 lakh+	< 1 lakh

Fastest Growing Jobs 2025-2030 (World Economic Forum Report 2025)

Viksit Bharat Young Leaders Dialogue, 2026

Key Challenges: Why Workforce Readiness Still Lags

SKILLS-INDUSTRY MISMATCH

- Curriculum remains theory-heavy
- Job roles evolve faster than academic updates
- Limited exposure to emerging sectors
- Training ecosystem needs modernization

Outcome: Degrees $\neq$ job-ready skills

RURAL & INCLUSIVE TALENT GAP

- Limited access to mentors & advanced labs
- Low exposure to future sectors (AI, EVs, green jobs)
- Technology adoption remains uneven
- Women & marginalized groups underrepresented

Outcome: Talent exists, access does not

MSMEs & MICRO-ENTREPRENEURS

- Regulatory & compliance complexity
- Infrastructure & logistics bottlenecks
- Skill gaps in quality & standardization
- Inefficient supply chains

Outcome: Growth potential remains untapped

SKILLS

FAILURE OF SKILL SIGNALING

- Degrees signal marks, not real capability
- No standardized proof of hands-on skills
- Employers struggle to trust or compare talent

Outcome: Skilled talent remains invisible and under-utilized

STATES WITH HIGHEST EMPLOYABILITY

2020 - 2026

IDEA 1

Integrating Education with a National Problem Marketplace

◊ What It Means

Real problems become projects, internships, and capstones

◊ Key Actions

- Colleges adopt real industry, MSME & local problems as coursework
- Mandatory project credits tied to problem outcomes
- Students work in teams with academic + industry mentors

◊ What this fixes

- Skills–industry mismatch
- Low job readiness

IDEA 2

Taking Future Skills to Rural India

◊ What It Means

Don't wait for rural youth to migrate — bring skills to them

◊ Key Actions

- Mobile skill vans for AI basics, EV repair, solar, drones
- District-level tech hubs for advanced exposure
- Hybrid learning: physical labs + online mentors

◊ What This Fixes

- Rural & inclusive talent gap
- Uneven state employability
- Migration-driven inequality

IDEA 3

From Agriculture to AgriTech: Future-Proofing India's Largest Workforce

◊ What It Means

Agriculture remains India's biggest employer — it must become high-skill

◊ Key Actions

- Training in agri-drones, precision farming, AI advisories
- Skills for value chains: storage, processing, logistics
- Farmer-to-entrepreneur pathways

◊ What This Fixes

- Underemployment in agriculture
- Low productivity & income stagnation

IDEA 4

Enabling MSME Hiring through Verified Skill Passports

◊ What It Means

MSMEs don't need more resumes — they need trusted proof

◊ Key Actions

- Digital Skill Passport for every learner
- Stores verified projects, internships & fieldwork
- MSMEs hire based on proof of capability, not degrees

◊ What This Fixes

- Skill signaling failure
- MSME hiring risk
- Network-based hiring bias

FUTURE-READY WORKFORCE PIPELINE

LEARNING BY DOING

- Education Integrated with Real-World Problems
- Curriculum linked to real challenges from industry, MSMEs, agriculture, defence, tourism & services
- Projects, internships & capstones replace rote, exam-centric learning
- Students graduate with applied, sector-relevant experience
- Long term - Student-led R&D generates \$100+B annually fueling innovation for millions of MSMEs.

ACCESS + VERIFICATION

- Skill Creation with Proof (Urban & Rural India)
- Skill development through colleges, rural skill hubs, mobile vans & field projects
- Covers AgriTech, manufacturing, MSMEs, defence production, tourism, energy & services
- Every skill and project recorded in a verifiable Skill Passport
- Long term - Verifying Millions skilled youth powers a \$30T economy with zero talent disparity

PRODUCTIVE EMPLOYMENT

- Trusted Hiring & Workforce Transition
- MSMEs and industries hire based on proof of capability, not just degrees
- Faster, low-risk hiring across agriculture, MSMEs, defence, tourism & services
- Workforce transitions into higher-productivity, sustainable roles
- Long term - MSMEs contribute 60% of India's GDP by accessing verified talent 10x faster.

Together, we are building an inclusive, future-ready India where every citizen can dream, achieve, and rise.

Thank You

Toward Viksit Bharat @ 2047
